

Chi-Hang Lam — Full List of Publications

(Updated September 18, 2023)

- [1] Udoka Nwankwo*, Yi-Di Wang, Chi-Hang Lam, and Nicolas Onofrio, “Charge equilibration model with shielded long-range Coulomb for reactive molecular dynamics simulations,” [The Journal of Chemical Physics](#) **159**, 044104 (2023).
- [2] Xin-Yuan Gao, Chin-Yuan Ong, Chun-Shing Lee, Cho-Tung Yip*, Hai-Yao Deng*, and Chi-Hang Lam*, “Kauzmann paradox: A possible crossover due to diminishing local excitations,” [Physical Review B](#) **107**, 174206 (2023).
- [3] Huilin You, Siqi Li, Yulong Fan, Xuyun Guo, Zezhou Lin, Ran Ding, Xin Cheng, Hao Zhang, Tsz Woon Benedict Lo, Jianhua Hao, Ye Zhu, Hwa-Yaw Tam, Dangyuan Lei*, Chi-Hang Lam, and Haitao Huang*, “Accelerated pyro-catalytic hydrogen production enabled by plasmonic local heating of Au on pyroelectric BaTiO₃ nanoparticles,” [Nature Communications](#) **13**, 1–9 (2022).
- [4] Gautham Gopinath, Chun-Shing Lee, Xin-Yuan Gao, Xiao-Dong An, Chor-Hoi Chan, Cho-Tung Yip*, Hai-Yao Deng*, and Chi-Hang Lam*, “Diffusion-coefficient power laws and defect-driven glassy dynamics in swap acceleration,” [Physical Review Letters](#) **129**, 168002 (2022).
- [5] X.-Y. Gao, H.-Y. Deng, C.-S. Lee, J.Q. You, and C.-H. Lam*, “Emergence of two-level systems in glass formers: a kinetic monte carlo study,” [Soft Matter](#) **18**, 2211 (2022).
- [6] M. Lulli, C.-S. Lee, L.-H. Zhang, H.-Y. Deng, and C.-H. Lam*, “Kovacs effect in glass with material memory revealed in non-equilibrium particle interactions,” [Journal of Statistical Mechanics: Theory and Experiment](#) **2021**, 093303 (2021).
- [7] C.-S. Lee, H.-Y. Deng, C.-T. Yip, and C.-H. Lam*, “Large heat-capacity jump in cooling-heating of fragile glass from kinetic monte carlo simulations based on a two-state picture,” [Physical Review E](#) **104**, 024131 (2021).
- [8] G.-Q. Zhang, Z. Chen, W. Xiong, C.-H. Lam, and J.Q. You*, “Parity-symmetry-breaking quantum phase transition via parametric drive in a cavity magnonic system,” [Physical Review B](#) **104**, 064423 (2021).
- [9] Cai-Qin Luo*, Si-Cong Zhu, Chi Xu, Shengqiang Zhou, Chi-Hang Lam, and Francis Chi-Chung Ling*, “Room temperature ferromagnetism in sb doped zno,” [Journal of Magnetism and Magnetic Materials](#) **529**, 167908 (2021).
- [10] Chun-Shing Lee, Matteo Lulli, Ling-Han Zhang, Hai-Yao Deng, and Chi-Hang Lam*, “Fragile glasses associated with a dramatic drop of entropy under supercooling,” [Physical Review Letters](#) **125**, 265703 (2020).
- [11] C.-T. Yip, M. Isobe, C.-H. Chan, S. Ren, K.-P. Wong, Q. Huo, C.-S. Lee, Y.-H. Tsang, Y. Han, and C.-H. Lam*, “Direct evidence of void-induced structural relaxations in colloidal glass formers,” [Physical Review Letters](#) **125**, 258001 (2020).
- [12] C.-Q. Luo, S.-C. Zhu, C.-H. Lam, and F.C.-C. Ling*, “Ferromagnetic behavior of native point defects and vacancy-clusters in zno studied by first principle calculation,” [Materials Research Express](#) **7**, 076103 (2020).
- [13] W. Xiong, J. Chen, B. Fang*, C.-H. Lam*, and J.Q. You*, “Coherent perfect absorption in a weakly coupled atom-cavity system,” [Physical Review A](#) **101**, 063822 (2020).

- [14] S. Wang, D. Ji, S.-C. Zhu, W. Zhao, K.-L. Yao, and C.-H. Lam*, “Approach to control magnetic plateau in tetrameric magnetic systems,” [Journal of Magnetism and Magnetic Materials](#) **513**, 167050 (2020).
- [15] S.-C. Zhu*, T.-Y. Hu, C.-T. Yip, K.-L. Yao, and C.-H. Lam, “Interface effect between blue phosphorus and metals,” [Physics Letters, Section A: General, Atomic and Solid State Physics](#) **384**, 126554 (2020).
- [16] M. Lulli, C.-S. Lee, H.-Y. Deng, C.-T. Yip, and C.-H. Lam*, “Spatial heterogeneities in structural temperature cause kovacs’ expansion gap paradox in aging of glasses,” [Physical Review Letters](#) **124**, 095501 (2020).
- [17] S.-C. Zhu*, T.-Y. Hu, K.-M. Wu, C.-H. Lam, K.-L. Yao, H.-R. Sun, and C.-T. Yip*, “Negative differential resistance effect of blue phosphorene-graphene heterostructure device,” [Journal of Physics Communications](#) **4**, 035005 (2020).
- [18] H.-Y. Deng, C.-S. Lee, M. Lulli, L.-H. Zhang, and C.-H. Lam*, “Configuration-tree theoretical calculation of the mean-squared displacement of particles in glass formers,” [Journal of Statistical Mechanics: Theory and Experiment](#) **2019**, 094014 (2019).
- [19] S.-C. Zhu*, S.-J. Peng, K.-M. Wu, C.-T. Yip, S.-L. Wang, K.-L. Yao, and C.-H. Lam*, “The study of the electron transport characteristics of bilayer blue phosphorus with different stacking by first principles,” [Journal of Physics D: Applied Physics](#) **52**, 385103 (2019).
- [20] C.T. Yip, T.W. Lo, S.-C. Zhu, G.Y. Jia, H. Sun, C.-H. Lam, and D. Lei*, “Tight-binding modeling of excitonic response in van der waals stacked 2d semiconductors,” [Nanoscale Horizons](#) **4**, 969–974 (2019).
- [21] X. Yu, F. Chen*, C.-H. Lam, and O.K.C. Tsui*, “Thermal-induced slippage of soft solid films,” [Physical Review E](#) **99**, 010501 (2019).
- [22] Z.-Z. Li, T.-F. Li, C.-H. Lam, and J.Q. You*, “Collective quantum phase slips in multiple nanowire junctions,” [Physical Review A](#) **99**, 012309 (2019).
- [23] H. You, Z. Wu*, L. Zhang, Y. Ying, Y. Liu, L. Fei, X. Chen, Y. Jia*, Y. Wang, F. Wang, S. Ju, J. Qiao, C.-H. Lam, and H. Huang*, “Harvesting the vibration energy of bifeo₃ nanosheets for hydrogen evolution,” [Angewandte Chemie - International Edition](#) **58**, 11779–11784 (2019).
- [24] Chi-Hang Lam*, “Deeper penetration of surface effects on particle mobility than on hopping rate in glassy polymer films,” [JOURNAL OF CHEMICAL PHYSICS](#) **149**, 164909 (2018).
- [25] Si-Cong Zhu, Shun-Jin Peng, Kai-Ming Wu, Cho-Tung Yip, Kai-Lun Yao, and Chi-Hang Lam*, “Negative differential resistance, perfect spin-filtering effect and tunnel magnetoresistance in vanadium-doped zigzag blue phosphorus nanoribbons,” [PHYSICAL CHEMISTRY CHEMICAL PHYSICS](#) **20**, 21105–21112 (2018).
- [26] Si-Cong Zhu, Cho-Tung Yip, Shun-Jin Peng, Kai-Ming Wu, Kai-Lun Yao, Chee-Leung Mak, and Chi-Hang Lam*, “Half-metallic and magnetic semiconducting behaviors of metal-doped blue phosphorus nanoribbons from first-principles calculations,” [PHYSICAL CHEMISTRY CHEMICAL PHYSICS](#) **20**, 7635–7642 (2018).
- [27] C.-H. Lam*, “Local random configuration-tree theory for string repetition and facilitated dynamics of glass,” [Journal of Statistical Mechanics: Theory and Experiment](#) **2018**, 023301 (2018).
- [28] Ming Xu, Linfeng Fei, Si-Cong Zhu, Wei Lu, Yanqing Lai*, Zhian Zhang, Chi-Hang Lam, and Haitao Huang*, “Multifunctional nitro₃ nanocoating fabrication based on the dual-kirkendall effect enabling a stable cathode/electrolyte interface for nickel-rich layered oxides,” [JOURNAL OF MATERIALS CHEMISTRY A](#) **6**, 2643–2652 (2018).

- [29] Jun Jing, Ting Yu, Chi-Hang Lam, J. Q. You, and Lian-Ao Wu*, “Control relaxation via dephasing: A quantum-state-diffusion study,” [PHYSICAL REVIEW A **97**, 012104 \(2018\)](#).
- [30] Jin Liu, Tsz Wing Lo, Jianhui Sun, Cho Tung Yip, Chi Hang Lam, and Dang Yuan Lei, “A comprehensive comparison study on the vibrational and optical properties of cvd-grown and mechanically exfoliated few-layered ws₂,” [JOURNAL OF MATERIALS CHEMISTRY C **5**, 11239–11245 \(2017\)](#).
- [31] Zeng-Zhao Li, Chi-Hang Lam, and J. Q. You, “Floquet engineering of long-range p-wave superconductivity: Beyond the high-frequency limit,” [PHYSICAL REVIEW B **96**, 155438 \(2017\)](#).
- [32] Chi-Hang Lam, “Repetition and pair-interaction of string-like hopping motions in glassy polymers,” [JOURNAL OF CHEMICAL PHYSICS **146**, 244906 \(2017\)](#).
- [33] Ling-Han Zhang and Chi-Hang Lam, “Emergent facilitation behavior in a distinguishable-particle lattice model of glass,” [PHYSICAL REVIEW B **95**, 184202 \(2017\)](#).
- [34] Hai-Yao Deng, Katsunori Wakabayashi, and Chi-Hang Lam, “Universal self-amplification channel for surface plasma waves,” [PHYSICAL REVIEW B **95**, 045428 \(2017\)](#).
- [35] Jun Jing, Chi-Hang Lam, and Lian-Ao Wu, “Non-abelian holonomic transformation in the presence of classical noise,” [PHYSICAL REVIEW A **95**, 012334 \(2017\)](#).
- [36] Linfeng Fei, Sheung Mei Ng, Wei Lu, Ming Xu, Longlong Shu, Wei-Bing Zhang, Zehui Yong, Tiewu Sun, Chi Hang Lam, Chi Wah Leung, Chee Leung Mak, and Yu Wang, “Atomic-scale mechanism on nucleation and growth of mo₂c nanoparticles revealed by in situ transmission electron microscopy,” [NANO LETTERS **16**, 7875–7881 \(2016\)](#).
- [37] Tiewu Sun, Haitao Huang, Biaolin Peng, Renkui Zheng, Chi-Hang Lam, Tao Tang, and Yu Wang, “Estimate bond angle dependence of superconducting transition temperature in nfeas with the first principle methods,” [SOLID STATE COMMUNICATIONS **246**, 12 \(2016\)](#).
- [38] Xiaohui Wen, Tiewu Sun, Wei-Bing Zhang, Chi-Hang Lam, Linxi Zhang, and Huaping Zang, “Helix-like structure formation of a semi-flexible chain confined in a cylinder channel,” [CHINESE PHYSICS B **25**, 093601 \(2016\)](#).
- [39] Linfeng Fei, Shuijin Lei, Wei-Bing Zhang, Wei Lu, Ziyuan Lin, Chi Hang Lam, Yang Chai, and Yu Wang, “Direct tem observations of growth mechanisms of two-dimensional mos₂ flakes,” [Nature Communications **7**, 12206 \(2016\)](#).
- [40] Wei Xiong, Da-Yu Jin, Yueyin Qiu, Chi-Hang Lam, and J. Q. You, “Cross-kerr effect on an optomechanical system,” [PHYSICAL REVIEW A **93**, 023844 \(2016\)](#).
- [41] Da-Wei Luo, P. V. Pyshkin, Chi-Hang Lam, Ting Yu, Hai-Qing Lin, J. Q. You, and Lian-Ao Wu, “Dynamical invariants in a non-markovian quantum-state-diffusion equation,” [PHYSICAL REVIEW A **92**, 062127 \(2015\)](#).
- [42] F. Chen, D. Peng, Y. Ogata, K. Tanaka, Z. Yang, Y. Fujii, N. L. Yamada, C. H. Lam, and O. K. C. Tsui, “Confinement effect on the effective viscosity of plasticized polymer films,” [MACROMOLECULES **48**, 7719–7726 \(2015\)](#).
- [43] Wei Xiong, Da-Yu Jin, Jun Jing, Chi-Hang Lam, and J. Q. You, “Controllable coupling between a nanomechanical resonator and a coplanar-waveguide resonator via a superconducting flux qubit,” [PHYSICAL REVIEW A **92**, 032318 \(2015\)](#).
- [44] Da-Wei Luo, Chi-Hang Lam, Lian-Ao Wu, Ting Yu, Hai-Qing Lin, and J. Q. You, “Higher-order solutions to non-markovian quantum dynamics via a hierarchical functional derivative,” [PHYSICAL REVIEW A **92**, 022119 \(2015\)](#).
- [45] Fei Chen, Dongdong Peng, Chi-Hang Lam, and Ophelia K. C. Tsui, “Viscosity and

- surface-promoted slippage of thin polymer films supported by a solid substrate,” [MACROMOLECULES](#) **48**, 5034–5039 (2015).
- [46] Zeng-Zhao Li, Chi-Hang Lam, and J. Q. You, “Probing majorana bound states via counting statistics of a single electron transistor,” [SCIENTIFIC REPORTS](#) **5**, 11416 (2015).
