

Chi-Hang Lam — Full List of Publications

(Updated June 30, 2017)

-
- [1] J. Jing, C.-H. Lam, and L.-A. Wu, “Non-abelian holonomic transformation in the presence of classical noise,” *Physical Review A* **95** (2017).
 - [2] L. Fei, S.M. Ng, W. Lu, M. Xu, L. Shu, W.-B. Zhang, Z. Yong, T. Sun, C.H. Lam, C.W. Leung, C.L. Mak, and Y. Wang, “Atomic-scale mechanism on nucleation and growth of mo₂c nanoparticles revealed by in situ transmission electron microscopy,” *Nano Letters* **16**, 7875–7881 (2016).
 - [3] F. Chen, D. Peng, Y. Ogata, K. Tanaka, Z. Yang, Y. Fujii, N.L. Yamada, C.-H. Lam, and O.K.C. Tsui, “Confinement effect on the effective viscosity of plasticized polymer films,” *Macromolecules* **48**, 7719–7726 (2015).
 - [4] Z.-Z. Li, C.-T. Yip, H.-Y. Deng, M. Chen, T. Yu, J.Q. You, and C.-H. Lam, “Approach to solving spin-boson dynamics via non-markovian quantum trajectories,” *Physical Review A - Atomic, Molecular, and Optical Physics* **90** (2014).
 - [5] C.-H. Lam and O.K.C. Tsui, “Crossover to surface flow in supercooled unentangled polymer films,” *Physical Review E - Statistical, Nonlinear, and Soft Matter Physics* **88** (2013).
 - [6] H. Y. Deng, R. N. Li, H. Huang, O. K. C. Tsui, and C. H. Lam, “Power spectral density of free-standing viscoelastic films by adiabatic approximation,” *Langmuir* **29**, 4283–4289 (2013).
 - [7] H. Y. Deng, H. T. Huang, and C. H. Lam, “Probable realization of rotor systems in sr₂io₃ and pbzr_{1-x}ti_xo₃,” *Physica B-Condensed Matter* **421**, 83–86 (2013).
 - [8] H.-Y. Deng, C.H. Lam, and H. Huang, “A two-plaquette polaron picture for the single-hole state of cuprates,” *Superconductor Science and Technology* **25** (2012).
 - [9] H. Y. Deng, C. H. Lam, and H. T. Huang, “On the origin of oxygen isotope exchange induced ferroelectricity in strontium titanate,” *European Physical Journal B* **85**, 6 (2012).
 - [10] Z. Z. Li, S. H. Ouyang, C. H. Lam, and J. Q. You, “Probing the quantum behavior of a nanomechanical resonator coupled to a double quantum dot,” *Physical Review B* **85**, 6 (2012).
 - [11] C. H. Lam, O. K. C. Tsui, and D. D. Peng, “Surface dynamics of noisy viscoelastic films by adiabatic approximation,” *Langmuir* **28**, 10217–10222 (2012).
 - [12] H.-Y. Deng, C.H. Lam, and H. Huang, “An atomistic approach to the dielectric modes of batio₃ and sr₂io₃,” *Solid State Communications* **151**, 474–477 (2011).
 - [13] Z. Z. Li, S. H. Ouyang, C. H. Lam, and J. Q. You, “Cooling a nanomechanical resonator by a triple quantum dot,” *Epl* **95**, 6 (2011).
 - [14] Z. H. Yang, A. Clough, C. H. Lam, and O. K. C. Tsui, “Glass transition dynamics and surface mobility of entangled polystyrene films at equilibrium,” *Macromolecules* **44**, 8294–8300 (2011).
 - [15] S.-H. Ouyang, C.-H. Lam, and J.Q. You, “Backaction of a charge detector on a double quantum dot,” *Physical Review B - Condensed Matter and Materials Physics* **81** (2010).
 - [16] Z. H. Yang, Y. Fujii, F. K. Lee, C. H. Lam, and O. K. C. Tsui, “Glass transition dynamics and surface layer mobility in unentangled polystyrene films,” *Science* **328**, 1676–1679 (2010).
 - [17] C. H. Lam, “Kinetic monte carlo simulation of faceted islands in heteroepitaxy using a multistate lattice model,” *Physical Review E* **81**, 8 (2010).
 - [18] R. X. Xiang, M. T. Lung, and C. H. Lam, “Layer-by-layer nucleation mechanism for quantum dot formation in strained heteroepitaxy,” *Physical Review E* **82**, 8 (2010).

- [19] Z. H. Yang, C. H. Lam, E. DiMasi, N. Bouet, J. Jordan-Sweet, and O. K. C. Tsui, “Method to measure the viscosity of nanometer liquid films from the surface fluctuations,” *Applied Physics Letters* **94**, 3 (2009).
- [20] O. K. C. Tsui, Y. J. Wang, F. K. Lee, C. H. Lam, and Z. Yang, “Equilibrium pathway of spin-coated polymer films,” *Macromolecules* **41**, 1465–1468 (2008).
- [21] C. H. Lam, M. T. Lung, and L. M. Sander, “Fast kinetic monte carlo simulation of strained heteroepitaxy in three dimensions,” *Journal of Scientific Computing* **37**, 73–88 (2008).
- [22] J. P. Zhang, S. H. Ouyang, C. H. Lam, and J. Q. You, “Readout of a single electron spin in a double quantum dot using a quantum point contact,” *Journal of Physics-Condensed Matter* **20**, 11 (2008).
- [23] S.-H. Ouyang, C.-H. Lam, and J.Q. You, “Shot noise in a quantum dot coupled to non-magnetic leads: Effects of coulomb interaction,” *European Physical Journal B* **64**, 67–72 (2008).
- [24] C. H. Lam and M. T. Lung, “Green’s function and super-particle methods for kinetic simulation of heteroepitaxy,” *International Journal of Modern Physics B* **21**, 4219–4224 (2007).
- [25] C.-H. Lam and M.T. Lung, “Green’s function and super-particle methods for kinetic simulation of heteroepitaxy,” *International Journal of Modern Physics B* **21**, 4219–4224 (2007).
- [26] S.-H. Ouyang, C.-H. Lam, and J.Q. You, “Dissipative dynamics of coupled quantum dots under quantum measurement,” *Journal of Physics Condensed Matter* **18**, 11551–11559 (2006).
- [27] J. L. Gray, R. Hull, C. H. Lam, P. Sutter, J. Means, and J. A. Floro, “Beyond the heteroepitaxial quantum dot: Self-assembling complex nanostructures controlled by strain and growth kinetics,” *Physical Review B* **72**, 11 (2005).
- [28] Y. Zhou, H. K. Chan, C. H. Lam, and F. G. Shin, “Effects of polarization and permittivity gradients and other parameters on the anomalous vertical shift behavior of graded ferroelectric thin films,” *Journal of Applied Physics* **98**, 6 (2005).
- [29] L. A. Braunstein and C. H. Lam, “Exact scaling in competitive growth models,” *Physical Review E* **72**, 5 (2005).
- [30] M.T. Lung, C.-H. Lam, and L.M. Sander, “Island, pit, and groove formation in strained heteroepitaxy,” *Physical Review Letters* **95** (2005).
- [31] C. H. Lam, “Fluid invasion in porous media: Viscous gradient percolation,” *Physical Review Letters* **92**, 4 (2004).
- [32] H. K. Chan, C. H. Lam, and F. G. Shin, “Time-dependent space-charge-limited conduction as a possible origin of the polarization offsets observed in compositionally graded ferroelectric films,” *Journal of Applied Physics* **95**, 2665–2671 (2004).
- [33] C. H. Lam, C. K. Lee, and L. M. Sander, “Competing roughening mechanisms in strained heteroepitaxy: A fast kinetic monte carlo study,” *Physical Review Letters* **89**, 4 (2002).
- [34] C.-H. Lam, C.-K. Lee, and L.M. Sander, “Competing roughening mechanisms in strained heteroepitaxy: A fast kinetic monte carlo study,” *Physical Review Letters* **89**, 2161021–2161024 (2002).
- [35] C. H. Lam and V. K. Horvath, “Comment on ”pipe network model for scaling of dynamic interfaces in porous media” - reply,” *Physical Review Letters* **86**, 6047 (2001).
- [36] J. Q. You, C. H. Lam, and H. Z. Zheng, “Superconducting charge qubits: The roles of self and mutual inductances,” *Physical Review B* **63**, 4 (2001).
- [37] J.Q. You, C.-H. Lam, and H.Z. Zheng, “Superconducting charge qubits: The roles of self and mutual inductances,” *Physical Review B - Condensed Matter and Materials Physics* **63**, 1805011–1805014 (2001).

- [38] J. Q. You, C. H. Lam, and H. Z. Zheng, “Landauer-buttiker formula for time-dependent transport through resonant-tunneling structures: A nonequilibrium green’s function approach,” *Physical Review B* **62**, 1978–1983 (2000).
- [39] J.Q. You, C.-H. Lam, and H.Z. Zheng, “Landauer-büttiker formula for time-dependent transport through resonant-tunneling structures: A nonequilibrium green’s function approach,” *Physical Review B - Condensed Matter and Materials Physics* **62**, 1978–1983 (2000).
- [40] C. H. Lam and F. G. Shin, “Anomaly in numerical integrations of the kardar-parisi-zhang equation,” *Physical Review E* **57**, 6506–6511 (1998).
- [41] C.-H. Lam and F.G. Shin, “Anomaly in numerical integrations of the kardar-parisi-zhang equation,” *Physical Review E - Statistical Physics, Plasmas, Fluids, and Related Interdisciplinary Topics* **57**, 6506–6511 (1998).
- [42] C. H. Lam and F. G. Shin, “Formation and dynamics of modules in a dual-tasking multilayer feed-forward neural network,” *Physical Review E* **58**, 3673–3677 (1998).
- [43] C. H. Lam and F. G. Shin, “Improved discretization of the kardar-parisi-zhang equation,” *Physical Review E* **58**, 5592–5595 (1998).
- [44] C. H. Lam, “Local isotropy and geometry of particle flux lines in diffusion-limited aggregation,” *Journal of Physics a-Mathematical and General* **29**, 1785–1794 (1996).
- [45] C. H. Lam, C. D. Beling, P. K. Mackeown, H. L. Au, and S. Fung, “A driven diffusion equation approach for optimization of a digital spectrum stabilizer,” *Nuclear Instruments Methods in Physics Research Section B-Beam Interactions with Materials and Atoms* **103**, 89–93 (1995).
- [46] C.-H. Lam, C.D. Beling, P.K. Mackeown, H.L. Au, and S. Fung, “A driven diffusion equation approach for optimization of a digital spectrum stabilizer,” *Nuclear Inst. and Methods in Physics Research, B* **103**, 89–93 (1995).
- [47] B. B. Mandelbrot, H. Kaufman, A. Vespignani, I. Yekutieli, and C. H. Lam, “Deviations from self-similarity in plane dla and the infinite drift scenario,” *Europhysics Letters* **29**, 599–604 (1995).
- [48] C. H. Lam, “Finite-size effects in diffusion-limited aggregation,” *Physical Review E* **52**, 2841–2847 (1995).
